HOW TO APPLY IT

Tools

Single brush machine and small brush or a paintbrush, wet vacuum.

Mode

Detergency: Dilute in water. Apply the solution on the support to clean, leave on 5-10 minutes and work with a single brush machine and scrubbing brush, remove the residues with wet vacuum cleaner. At the end rinse the surface

As stain remover on porcelain stoneware: Apply the product pure with a small brush or a paintbrush, leave on for 10-20 minutes and then collect the dirt with a damp sponge. Rinse at the end with clear water. For stubborn dirt we recommend to cover the stain with a plastic sheet and leave on the product for several hours, then collect the dirt with a damp sponge and rinse at the end.

To remove the epoxy residues put the product pure on the residues and let it work for 10 minutes. Intervene with a mechanical action in order to scrub and remove the residues. Rinse at the end with clear water.
